

# Roadmap

01

## Rarity Distribution and Planning in the Breeding Lab

The scientists will be experimenting on different type of biological enhancements on the Snailana species. Different Snails will have different attributes and there will be a set percentage to include different rarities for future adopters.

02

## Launch

### All the snails have escaped!

Some wear hats, some seem to have fishbowls as shells and for some reason.. that one is smoking. All the snails are ready to migrate but they need your help! Adopt them as quick as possible so that you can care for your new slimy friend and aid them in their mission to Planet Solana!

Date 14th September 2021, (3pm UTC)

03

## Being listed on a marketplace

All snail adopters are able to trade their pets around ♥ in different neighbourhoods! How amazing

Aimed marketplaces that are to be listed for Snailana are.

- Solsea
- Solana Art
- Digital Eye

04

## Community building!

### The neighbourhood has been set!

But... 6074 isnt exactly a very nice number. LETS GET IT TO 100 more :D. The world needs to know more about this endangered species

- 100 snails will be given away to influencers for marketing purposes

05

## Racing Game/ Staking game

### Snails need exercise too!

To ensure all snails are well-trained and fit to fly in space, we are encouraging all adopters to take part in the Snail Race. As motivation and thanks, the Snailana species will reward you with a percentage of the royalty to the top 5 racers after each Snail Race.

- A requirement to take part in the Snail Race is to be a holder of the NFT.
- A weekly tournament game with roughly 100 participants will be hosted.
- Top 5 racers will be rewarded with a percentage of the royalty recieved.
- Depending on the number of people that hold the cards, we may be able to adjust in order to appease the audience or through a community vote.

06

## Roadmap update

### Around 6 months down the line

A lot needs to be planned for everyone to reach to Planet Solana safely. The scientists want to take the responsibility and ensure that every snail makes it to Planet Solana. Some plans will need to be revised as things go along. Of course, When we do reach, there's always more to come

07

## Some of the few programs

### that are expected to be held on planet Solana are

- **Farm/ Hatchery** for baby snails to grow up and be taken care of by cryptonians!
- **Snail Tinder** exclusively for Adopters to mingle with the single and possibly find a Solmate ♥ (pun intended)
