## 04 Ecosystem

### **Solana**

Solana is the world's fastest blockchain and cryptocurrency ecosystem, with over 400 projects spanning DeFi, NFTs, Web3, and more.

### **Transaction fees**

Solana was chosen because its transaction costs are lower than those of Ethereum. This allows investors to invest without worrying about incurring fees.

### **Transaction Rate**

Solana transactions are faster than Ethereum transactions, with 50,000 or more transactions per second (TPS) compared 15 to 45 TPS for Ethereum.

### **Growth Opportunity**

We think that by developing projects on Solana, a much younger network than Ethereum, we would be able to grow and broaden our exposure to the cryptocurrency sector.
